

ARMSTRONG LOCKSMITH INC

Storefront: 208 Thompson Ln, Nashville, TN 37211 • (615) 625-8000

CURRENT WEBSITE STATUS & RECENT WORK COMPLETED

1.

SEO & SITEMAP HEALTH:

100% clean. The noindex review redirect was excluded from sitemap-0.xml. All 42 URLs are clean, indexable 200 OK pages.

2.

HEADING & SCHEMA:

Missing <h1> on /book-online/ fixed. BreadcrumbList schema on homepage corrected. 769+ Google Reviews (4.9 Stars) aggregateRating added to base schema.

3.

CLIENT HYDRATION & ANTI-CLAIM:

Reviews API fallback updated to 769 reviews and all 15/20-min claims scrubbed.

4.

INTERNAL NAVIGATION:

All internal links to /book-online/ navigate smoothly in the same window (zero target="_blank").

STRICT PROJECT & APP ISOLATION RULE (PERMANENT)

NEVER TOUCH, MODIFY, OR RUN ANY COMMANDS THAT AFFECT OTHER GITHUB REPOSITORIES OR SERVER APPLICATIONS

—especially

ARMSTRONG AI DISPATCH (ARMSTRONG-AI-CALL-DISPATCH / JQKVDRPCFZ)

. All actions must strictly target armstrong-astro / btfdkcdpdw only.

1. OPENING THE PROJECT AT YOUR SHOP COMPUTER

Case A: If the repository is already on your shop computer:

```
# 1. Open PowerShell or Terminal and navigate to the project:
cd armstrong-astro

# 2. Pull all updates pushed from home (gets commit 781a010):
git pull origin main

# 3. Start local development preview server:
npm run dev
```

→ Open your browser at: <http://localhost:4321>

Case B: If setting up fresh on a new computer at the shop:

```
# 1. Make sure Node.js and Git are installed, then clone:
git clone https://github.com/ezzadr/armstrong-astro.git
cd armstrong-astro
```

```
# 2. Install dependencies & start preview:
npm install
npm run dev
```

2. HOW TO BUILD & DEPLOY UPDATES LIVE TO CLOUDWAYS

Cloudways serves static files directly from the git repository root. Always build and sync before committing:

```
# Windows PowerShell Deployment Command (Run inside armstrong-astro):
npm run build
Copy-Item "dist\" "*" "." -Recurse -Force
git add -A
git commit -m "Describe your changes"
git push origin main
```

** Pushing to origin/main automatically triggers Cloudways build and deployment to live production!*

3. NON-NEGOTIABLE PROJECT RULES

No Suburb Doorway Pages

Do NOT create individual suburb doorway pages (e.g. /locksmith-brentwood/). All regional mobile coverage remains consolidated on /service-areas/.

Canonical Review Count

Always state

769+ Google Reviews (4.9 Stars)

across all headings, badges, schema, and API fallbacks.

Strict Zero-Curve Rule

Every element site-wide MUST have border-radius: 0px !important; (sharp industrial luxury styling).

No Fake Response Claims

Never use "15-minute" or "20-minute" response claims. Always use "Prompt Mobile Dispatch".

4. COPY-PASTE AI PROMPT FOR TOMORROW AT THE SHOP

TO RESUME WORK WITH ANTIGRAVITY / CURSOR / CLAUDE AT THE SHOP, COPY & PASTE THIS:

"We are continuing work on the Armstrong Locksmith website (armstrong-astro). The repo is up to date on origin/main (commit 781a010). All project rules in AGENT_HANDOVER.md and AGENTS.md apply: strict isolation (never touch Armstrong AI Dispatch), zero suburb doorway pages (coverage stays consolidated on /service-areas/), canonical review count is 769+ Google Reviews (4.9 Stars), zero-curve rule (border-radius: 0px), and prompt mobile dispatch. What are we working on next?"
